Abdul Hadi

Laravel & JavaScript

Profile

Aspiring Laravel and PHP developer currently pursuing an Advanced Diploma in Software Engineering (ADSE) at Aptech Computer Education, Karachi (3rd semester). Built Laravel and MySQL web applications through personal projects, including a real-time chat application and an e-commerce store, using JavaScript for front-end interactivity. Seeking a Laravel Developer Intern, PHP Developer Intern, or Junior Laravel Developer role to contribute to a team and keep growing.

Projects

Chatify – Real-Time Chat Application

Personal project | Laravel 12, Laravel Reverb, Laravel Echo, WebSockets

- Built a real-time chat application with Laravel 12, using Laravel Reverb (WebSockets) and Laravel Echo to deliver live messaging and online status.
- Implemented one-to-one and group chats, file attachments, message editing and deletion, friend requests, and user blocking.
- Developed sign-up with OTP verification and password reset; secured conversations with private channels so only chat members can access them.

E-Commerce Web Application (Laravel)

Personal project | Laravel, MySQL

- Developed a single-vendor online store with Laravel and MySQL, including a shop page for browsing products and viewing related products from the same category.
- Built a shopping cart (add, remove, and update quantities) and a complete checkout flow with address details, order summary, and order confirmation.
- Created an admin panel for managing products, the catalog, and customer orders.

Library Desk – Library Management System

Personal project | Laravel 12, SQL Server, JavaScript, Chart.js

- Built a library management system with Laravel 12 and SQL Server for managing books, members, and book issue and return.
- Implemented automatic late fine calculation and a dashboard with charts for issued and overdue books.
- Added secure admin login with password reset and a scheduled daily email report of overdue books.
